DETAILED ACTION

Response to Amendment

The declaration filed on 4/2/09 under 37 CFR 1.131 is sufficient to overcome the Lingenfelder et al. (US 6558380) reference. The declaration provides evidence of constructive reduction to practice of the invention as claimed in the form of a drawing dated 11/06/00 of the claimed invention, which effectively predates the Lingenfelder art reference.

Allowable Subject Matter

Claims 76, 77, 78 and 80 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art fails to teach or suggest a cardiac tissue ablation apparatus defined by the combination of elements as recited in independent claim 76, including first and second jaw assemblies, each jaw assembly having an internal jaw support member and an insulative cover which surrounds the jaw support member to prevent contact of the support member with the selected tissue ablation area, and the insulative cover located on each side of an elongated conductive member on each jaw, forming a clamping surface, and the respective elongated conductive members being in face to face relation. Dorn (US 6334860 B1) discloses jaw assemblies each having an internal jaw support member [56, 58, Fig. 2], an elongated conductive member [36, 38] and an insulative cover [32, 34], but fails to teach the insulative cover located on each side of the conductive members to form the clamping surface.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
